Subject: Portland Harbor

Dear EPA

After careful consideration of the different plans the EPA has for the Portland Harbor Super Fund Clean up Pleas Use Plan G.

- 1-We also need Independent air, water, light, and noise monitoring during the cleanup
- 2-Healthy Fish after cleanup including fish guts, skin and meat
- 3-I oppose any toxic waste dump at T4 or anywhere adjacent to or in the river.
- 4- It will do no good long term if new contamination covers what is done. So up river sources of pollution need to be carefully monitored during and after the cleanup.
- 5-Do not allow toxic contaminants to remain in the river for the foreseeable future no monitoring with out some action to clean up, cover up or dredging.
- 6- No dilution to spread the chemicals down river
- 7- Polluters must pay for the clean up not tax payers PRP need to pay and post performance bonds
- 8- Hire locally from the Portland community
- 9-Tribal consultation and coordination need to be improved as it is almost none existent now.
- 10-Restoration of any lost habitat
